

FCC;

I think that the NAB attack on the XM Satellite radio system is a bunch of bull. I travel this great country of our on my motorcycle and it is so wonderful to list to my system with no commerical interruptions. It is of value to me to be able to listen to the news channel and keep in touch with what is going on here as well in the world as I travel. I also like the fact that I can tune into my weather channel and know what ahead for me. This is a valuable resource for me traveling on a motorcycle. I would hate to see some one like the NAB push the little guys around because their system is so much better than they can provide. I would hope that you would not take the NAB side and allow the XM folks to continue to provide their wonderful services. PLease vote no to cancel the news and weather services. Thanks so much for listening to us consumers.
